## SUMMARY

Motivated Computer Science undergraduate with a solid foundation in software engineering principles, data structures, and application development. Skilled at applying programming concepts to develop practical, end-to-end solutions for real-world problems. A quick learner with strong analytical, problem-solving, and adaptability skills, committed to continuous learning and professional growth.

## EDUCATION

| Degree / Board | Institution                      | Year      | CGPA / %  |
|----------------|----------------------------------|-----------|-----------|
| B.E – CSE      | V.S.B Engineering College, Karur | 2023–2027 | 7.67 / 10 |
| Class XII      | Sun Star Higher Secondary School | 2023      | 84%       |

## TECHNICAL SKILLS

|            |                                     |
|------------|-------------------------------------|
| Languages  | Java, C#, JavaScript, HTML, CSS     |
| Frameworks | React.js, Node.js, Spring Boot      |
| Databases  | MySQL, Qdrant                       |
| Tools      | Git, GitHub, VS Code, Docker, Linux |
| Concepts   | Data Structures, REST APIs, JDBC    |

## INTERSHIPS

### Virtual Internship 6.0 – Infosys

Java Full Stack Development

Feb 2026 - Apr 2026

- 6-week training in Java, Spring Boot, React.js, REST API design, and database integration following Infosys industry-standard workflows.
- Built and deployed full-stack applications applying MVC architecture and Git version control across the development lifecycle.

## PROJECTS

### AGROW-AI – AI-Powered Smart Agriculture Assistant

React.js | Vite | Tailwind | Supabase | Weather API | Gemini AI

- Full-stack agricultural platform with crop disease detection, yield prediction, and AI-driven farming recommendations using real-time weather and soil data.
- Responsive dashboard with irrigation and fertilisation advisory modules enabling data-backed decisions across devices.

### INSURE-AI – AI-Powered Insurance Management Platform

React.js | SpringBoot | REST APIs | JWT

- Insurance management system with AI-driven risk assessment, policy recommendation, and predictive analytics for end-to-end operations.
- JWT-secured role-based access control and scalable multi-user claims and appointment management.

### VECTOR PROJECT – Full-Stack Vector Data Management System

React.js | Node.js | Endee vectorDB | MongoDB | JWT

- Full-stack platform for storing, retrieving, and visualising vector-based data with a React frontend and Node.js/Express REST API backed by MongoDB.
- JWT authentication and monorepo architecture separating frontend and backend for scalability and maintainability.

## CERTIFICATIONS

- Java Full Stack Development – Infosys Springboard

## SOFT SKILLS

- Problem Solving
- Logical Thinking
- Team Collaboration
- Self-Learning
- Adaptability

## LANGUAGES

- Tamil (Native)
- English (Professional)
