SUMMARY

Computer Science undergraduate (2023–2027) with demonstrated ability to architect and ship full-stack, AI-integrated web applications independently. Designed and delivered three production-ready systems – an agricultural intelligence platform (Agrow-AI), an AI-powered insurance management suite (Insure-AI), and a vector data management system – using React.js, Node.js, Express.js, MongoDB, JWT authentication, and Gemini AI. Completed the Infosys Virtual Internship 6.0 in Java Full Stack Development, gaining industry exposure to Spring Boot, MVC architecture, and Agile workflows. Brings strong fundamentals in OOP, REST API design, and scalable system architecture. Eager to contribute immediately to an engineering team as a placement hire.

EDUCATION

Degree / Board	Institution	Year	CGPA / %
B.E – CSE	V.S.B Engineering College, Karur	2023–2027	7.36 / 10
Class XII	Sun Star Higher Secondary School	2023	84%

PROJECTS

AGROW-AI – AI-Powered Smart Agriculture Assistant	React.js Vite Tailwind Supabase Weather API Gemini AI
- Full-stack agricultural intelligence platform with crop disease detection, yield prediction, and AI-driven personalised farming recommendations using real-time weather and soil data. - Responsive dashboard with irrigation and fertilisation advisory modules enabling data-backed decisions across devices.	
INSURE-AI – AI-Powered Insurance Management Platform	React.js Node.js Express.js REST APIs JWT
- Comprehensive insurance management system with AI-driven risk assessment, policy recommendation, and predictive analytics for end-to-end operations. - JWT-secured role-based access control, fully documented OpenAPI REST endpoints, and scalable multi-user claims management.	
VECTOR PROJECT – Full-Stack Vector Data Management System	React.js Node.js Express.js Supabase JWT
- Full-stack platform for storing, retrieving, and visualising vector-based data with a React frontend and Node.js/Express REST API backed by MongoDB. - JWT authentication, environment-based configuration, and monorepo architecture separating frontend and backend for maintainability.	

INTERSHIPS

Virtual Internship 6.0 – Infosys	Feb 2026
Java Full Stack Development	Infosys Springboard
6-week training in Java, Spring Boot, React.js, REST API design, and database integration following Infosys industry-standard workflows. - Built and deployed full-stack applications applying MVC architecture, Git version control, and Agile best practices.	

TECHNICAL SKILLS

Languages	Java, JavaScript, HTML5, CSS3
Frameworks	Spring Boot
Databases	MySQL
Tools	Git, GitHub, VS Code, Linux
Concepts	OOP, DSA

CERTIFICATIONS

• Java Full Stack Development – Infosys Springboard	Feb 2026
---	----------

SOFT SKILLS

• Problem Solving	• Logical Thinking	• Team Collaboration	• Self-Learning	• Adaptability
-------------------	--------------------	----------------------	-----------------	----------------

LANGUAGES

• Tamil (Native)	• English (Professional)
